

FO Field

Genuine alternative
to splicing

Flexibility.

Cabling freedom.

Freedom in fiber optic cabling – R&M's FO Field gives users independence and enables to complete many projects quickly and fully, without any special training. The process requires significantly less effort than splicing.

1 Lowest IL and RL values

2 Fully compatible with common adapters and pigtails / patch cords

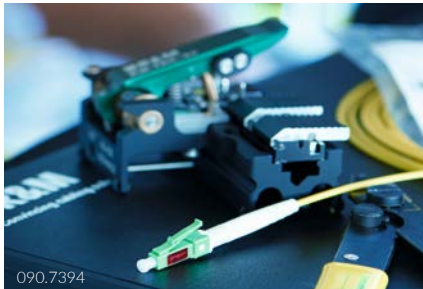

3 Space saving

4 Easy training, fast roll out

The high-performance field-installable connectors are combinable with all cable types.

Efficiency.

Easy mounting.

Complete projects quickly

Immediately repair, modify or add fiber optic cabling with the FO Field. The FO Field allows for at least five new cabling without loss of quality. Even local data networks can be retrofitted and modified at any time without interrupting operations. This makes the FO Field an extremely efficient, cost-effective and streamlined solution. In addition, no external splicing service provider is required for maintenance work.

First-class performance

The FO Field meets every requirement for high data rates and low attenuation.

Fully tested

The FO Field components are manufactured under clean room conditions according to R&M's exacting quality standards.

Time saving

Quick mounting technology simplifies the assembly of the FO Field, saves time and speeds up projects.

Multifunctional connector

True to its modular principle, the FO Field can be combined with all of R&M's connection and distribution platforms.

Create patch cables yourself

With the FO Field can one proprietary specialist terminate patch cable fast in any desired length or repair broken cables at any time.

An economic solution

Small effort, big results. Choosing the FO Field also means choosing the more economic option.

FO Field.

The most important benefits.

Alternative to splicing

- Usable in any application thanks to superior IL and RL performance
- Ideal for mass roll-out due to easier training compared to splicing

Time and cost saving

- Competitive pricing compared to pre-assembled pigtails and patch cords
- Installation in less than 60 seconds
- Less tool costs to start with

Durable solution

- As part of the R&M Freenet program warranty on 25 years of service life
- Also applicable for outdoor application
- High mechanical durability
